

Step 1:

Divide the contents of the box into two identical sets using the parts list as a guide (each set will make one complete drawer assembly). The drawer front is identified by the two screw holes in the face which correspond to the threaded inserts mounted in the back side of the faceplate. Using the phillip-headed wheel screws, screw the wheels into both ends of each drawer side through the pre-drilled holes located on the face just above the groove.

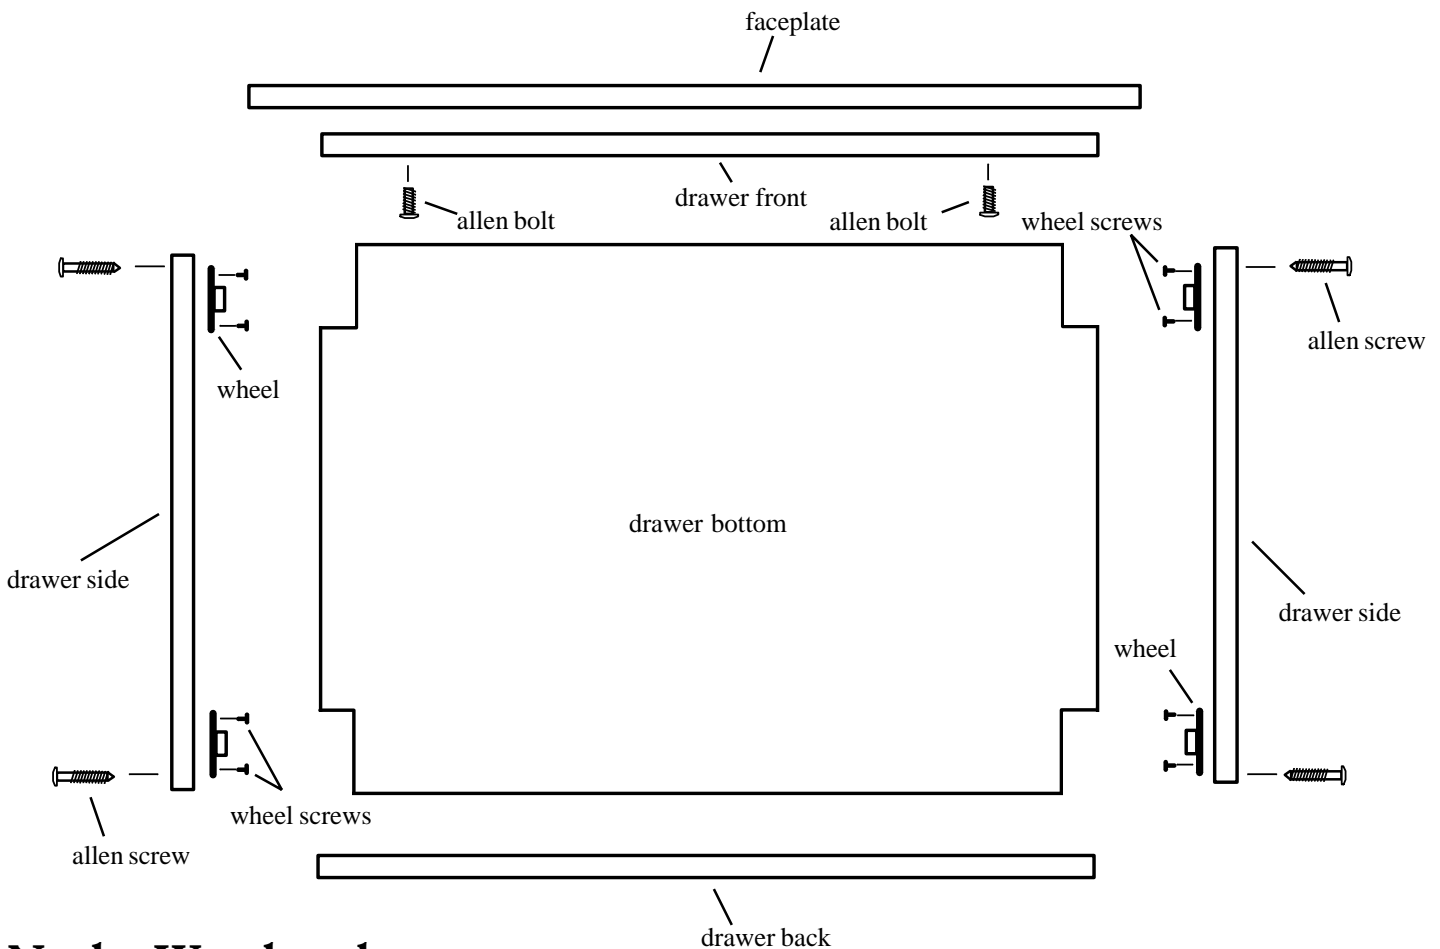

Step 2:

Attach the drawer front and drawer back to one of the drawer sides by inserting two allen screws into the drill-outs on each end of the drawer side face and tighten into the pre-drilled holes. Make sure the grooves in each piece correspond to create a single continuous groove. Slide the drawer bottom into the groove until it is seated firmly. Attach the last drawer side and tighten.

Step 3:

Attach the faceplate to the drawer front by screwing the short allen bolts into the threaded inserts and tighten.

Parts List (2 sets per box)	
1	Faceplate
2	Drawer sides
1	Drawer back
1	Drawer front
1	Drawer bottom
4	Wheels
8	Allen screws
8	Wheel screws
2	Allen bolts
